SUMMARY PROFILE

Second-year student at President University majoring in Information Technology with a concentration in Cyber Security. Possesses skills and knowledge in Html/CSS, SQL, PHP, Python, steganography, and encryption, demonstrating a strong foundation in data management, web development, programming, and digital forensic analysis. Skilled in managing and coordinating events, leading teams, and supporting participants, showcasing leadership, effective communication, and teamwork abilities. Seeking internship opportunities to further apply and develop technical skills and soft skills in databases, network security, and digital forensics.

EDUCATION

President University

Bachelor of Science in Information Technology

Cumulative GPA: 3.65/4.00

Bekasi, Indonesia

September 2022 – Expected December 2025

PROFESSIONAL EXPERIENCE

Start Up Fab-Creation 2022

Liaison Officers

Bekasi, Indonesia

November 2022

- Facilitated seamless communication between competition participants and organizers, ensuring clarity on registration procedures and event guidelines, showcasing strong coordination and interpersonal skills.
- Managed participant requirements and benefits according to pre-established agreements, efficiently liaising with the organizing committee to meet participant needs, demonstrating meticulous attention to detail and organizational abilities.
- Provide support to participants during the 3-day event, ensuring that all needs are met and the event runs smoothly, while also serving as a backup system for other divisions that require extra assistance, showcasing adaptability and teamwork skills.

PROJECT EXPERIENCE

Steganography and Encryption (Individual Project)

Python

Bekasi, Indonesia

July 2024

- The main focus of this application program is to develop a program to conceal messages within images and encrypt text, demonstrating expertise in Python programming and data security techniques.
- Utilized Visual Studio Code for coding and debugging, showcasing proficiency in integrated development environments and code management.

Anime Recommendation Management (Group Project)

Html/CSS, PHP, MySQL, phpMyAdmin

Bekasi, Indonesia

March 2024 - April 2024

- The main focus of this web application is to assist users, particularly those who enjoy anime and need information about specific anime. This web application is designed to help users find the information they need, such as trailers, synopses, reviews, and recommendations.
- Implemented Html/CSS and PHP in the development of this web application to create an attractive and user-friendly interface.
- Utilized MySQL for database management and phpMyAdmin for easy administration and handling of the database.
- Analyzed entity relationship diagrams, use case diagrams, class diagrams, activity diagrams, and sequence diagrams, applying software engineering principles to enhance application functionality.

Speech Recognition (Group Project)

Python

Bekasi, Indonesia

March 2024 - April 2024

- The main focus of this application program is to implement artificial intelligence that allows users to perform automatic speech recognition and convert speech into written text. Users can also save each converted text or audio. The program is designed to address challenges in voice recognition and help improve communication efficiency.
- Implementing Python in developing this program to harness the strength and flexibility of the programming language in data processing and developing artificial intelligence algorithms, ensuring the program runs efficiently and smoothly.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Community of Love President University (COOL)

Member of Discipleship Divisions – Growing Group Coordinator

Bekasi, Indonesia

October 2023 – July 2024

- Planning weekly activities by selecting themes and contexts based on their urgency and relevance to participants, thus increasing participant interest in regular activities, showcasing strategic planning and engagement skills.
- Leading a key program in the discipleship program, namely Prayer Fellowship, as the Master of Ceremony, overseeing the event from start to finish to ensure smooth execution, demonstrating leadership and event management skills.
- Acting as a liaison officer for speakers, ensuring their materials align with the given theme, managing speaker preparations leading up to the event day, and ensuring speaker needs are met, showcasing communication and coordination abilities.

COOL God Salvation 2024

Person in Charge, Food and Beverage

Bekasi, Indonesia

January 2024 - April 2024

- Managing the Food and Beverage team by assigning tasks and responsibilities, designing expenditure budgets, and coordinating team efforts, demonstrating leadership and budget management skills.
- Communicating with food and beverage vendors, organizing consumption distribution, and overseeing implementation by the team, showcasing communication and event planning skills.
- Leading the preparation and evaluation of the Food and Beverage division, ensuring tasks are completed effectively and assessing team members' performance, demonstrating leadership and results evaluation abilities.

COOL Christmas 2023

Fund Raising

Bekasi, Indonesia

October 2023 - November 2023

- Actively involved in fundraising activities through sales, ensuring each transaction meets or exceeds the set targets. Formulating and implementing effective sales strategies to boost sales and achieve the expected financial goals.
- Ensuring timely and proper delivery of customer orders, contributing to the logistics process from packaging to delivery. Providing excellent customer service by ensuring customer satisfaction through effective communication and responsiveness to their needs and concerns.
- Playing an active role in the design and development of promotional materials such as flyers, both for online and onsite platforms. Utilizing creativity and graphic design skills to create engaging and effective promotional materials, aiming to enhance product visibility and attract customer interest.

Cultural Festival 2023

Liaison Officers

Bekasi, Indonesia

Juli 2023 - November 2023

- Managing data of potential participants showcasing their cultural performances in the Cultural Festival, confirming their participation, and providing finalized participant data to the event team, demonstrating data management and coordination skills.
- Contacting confirmed participants regarding all performance components they need, such as props, music, themes, background stories, and explaining the festival's guidelines, showcasing effective communication skills and understanding of performance needs.
- Supporting participants in their preparations before performing and serving as a runner to escort performances from the waiting area to the stage, demonstrating time management and event coordination skills.
